Haugen Grapple Fork

[Call for Pricing](#)

This grapple fork will turn your skid steer into a demolition machine! From ripping trees out, to tearing grain bins or buildings down, this thing is just plain wicked. It is constructed of heavy duty steel with replaceable bottom teeth, along with the two thumbs to help you move, tear, demo, or load tons of different materials. We've personally put one of these things through the paces and have not been able to bend one yet, and trust me, we've tried!!
